

Maximum Vessel Size

Berth	L (ft)	B (ft)	D (ft)
1	40	22	12
2	60	22	12
3	60	22	12
4	60	22	12
5	60	22	12
6	30	15	8
7	90	22	12
8	25	12	12
Pontoon	90	22	6 at spring tides, 10 at neap tides

Vessels up to the length of 110ft can be berthed on NW quay over 2 berths. Vessels over 110ft are unable to turn into berth after coming through entrance. All berths dry out at spring tides. Vessels with draught over 4ft take the bottom. Maximum draught is governed by depth in approach channel. (Amount of silting governs the depth in approach channel; height of SE swell also restricts vessel draught in approach channel).
