

YOUR DETAILS	
Your Name (and organisation if applicable)	Kenneth Stewart Munro
Your Address / Contact Details	9, Kinbeachie, Culbokie, Dingwall IV7 8LS
Landowner's Name (if known / applicable)	As above.
Agent (if applicable)	
Agent's Address / Contact Details (if applicable)	

REASONS FOR YOUR DEVELOPMENT SITE SUGGESTION	
How can the site be serviced? (give details of proposed access, foul drainage surface water and water supply arrangements)	Access would be from the adjacent adopted public road leading to Kinbeachie Farm. A water supply is available within 10 metres of the site boundary across the Kinbeachie access road. The electricity HT line is within 120 metres of the site and permission would be sought from the adjacent land owner to bring in a LT supply under ground. Foul drainage would be dealt with by a septic tank draining to a soakaway. Surface water would be dealt with by the use of soakaways.
What are the site's constraints and how can they be resolved or reduced? (e.g. does the site flood, are there protected species present, will good farmland be lost, will the local landscape be affected, will valued trees be felled, are any other heritage features likely to be affected?)	The site is very exposed. It would be the intention to purchase adjacent land and plant out with native species to provide shelter and to reduce the visual impact from the B9163. Also the site having originally been a quarry that had been filled in over the years the necessary contamination checks would be made and all appropriate remediation carried out. The net effect to the landscape should be a significant improvement with the removal of a piece of dereliction adjacent to the B9163. The view from the surrounding area would be little affected as it would be only the addition of one dwelling close to the Kinbeachie access road which currently serves a significant settlement.
What benefits will result to the wider community from the site's development? (e.g. will there be more or better jobs, will the land be put to a more productive use, will the development increase infrastructure capacity for others, will more affordable houses result, is there an unmet demand for the development?)	Unightly derelict site removed.
What impact will there be on travel patterns from the site's development? (e.g. will more or less people engage in healthy and active travel (walk, cycle) or go by public transport as a result of the site's development rather than travel by private car?)	
Is the site well connected? (e.g. will the average travel time to community and commercial facilities reduce or increase as a result of the site's development, is the proposed use compatible with existing / proposed surrounding uses?)	
Is the site energy efficient? (e.g. will the site allow for energy efficient siting, layout, building design and local renewable energy source connection?)	There should be space to utilise a ground source heat pump.
What other negative impacts will the development have and how will they be resolved or offset? (e.g. will the site's development increase any form of pollution or decrease public safety?)	

DETAILS OF SITE SUGGESTED	
	Derelict land on site of disused sheep wash and filled in quarry at the junction of the Kinbeachie access road and the B9163.
Site/Local Name (if different from above)	
Site Size (hectares)	0.12 Ha
Grid Reference (if known)	NH 6268 6245
Proposed Use (e.g. housing, affordable housing, employment, retail, waste, gypsy traveller, utility, community, retained public open space)	House site.
Proposed Non Housing Floorspace / Number of Housing Units (if known/applicable)	One house.
Map	Attached

If you wish to suggest a site that should not be built on fill in this form	
REASONS WHY YOUR SITE SHOULD BE SAFEGUARDED FROM BUILDING	
How do the public enjoy the space - e.g. used for dog walking, children's play?	
What makes the site more special than other areas in the village/town?	
o	

No.	Issue	Detailed Explanation	Answer	Any Proposed Mitigation Measures (how will you reduce or offset the effects of your development?)
1	a) Will the site safeguard any existing open space within the area? b) Will the site enable high quality open space to be provided within the area?	Will the site have any impact on useable public open space (such as parks, playing fields etc) or any opportunities to create additional public open space?	No effect.	
2	Will the site encourage and enable provision for active travel (walking, cycling and public transport use)?	- Is any part of the site within 400m straight line distance of any community/commercial building? or will development provide a community/commercial building within walking distance of existing residential areas?  - Are there opportunities to create new walking/cycling routes or improve existing routes?	No  No	
3	Does the site provide an opportunity for you to provide a financial contribution towards encouraging more sustainable travel patterns?	For example, can a subsidy to a local bus route be provided?	No	
4	Will the site involve "off site" road improvements that will contribute to road safety?	Is the site likely to improve the local road network such as junctions or crossings?	Yes	
5	Is there scope for road safety measures as part of the development of the site?	Will development incorporate on-site traffic calming measures (e.g. speed bumps) or street lighting? Will it incorporate the principles of Designing Streets available via: <a href="http://www.scotland.gov.uk/Publications/2010/03/22120652/0">http://www.scotland.gov.uk/Publications/2010/03/22120652/0</a>	No	
6	Is the site near any existing "bad neighbour" uses?	Will the site be negatively affected by any neighbouring use? (bad neighbour uses include those that affect residential property by way of fumes, vibration, noise, artificial lighting etc). Is the site affected by any of the Physical Constraints identified in the Council's Physical Constraints: Supplementary Guidance?	No	
7	Are there any contaminated land issues affecting the site?	Are you aware if the site has been previously used for industrial or any other uses likely to cause contamination?	Potential problems being the site of a filled in quarry.	Testing will be carried out and any remedial required work carried out.
8	a) Is the site on derelict, vacant or other land that has previously been used? B) Is the site on greenfield land?	<a href="http://www.scotland.gov.uk/Publications/2010/01/26135819/0">Has the site been identified in Scottish Government's Vacant and Derelict Land Survey (which can be found here: http://scotland.gov.uk/Publications/2010/01/26135819/0</a> or has the land got an existing use? B) Will the site be located on presently undeveloped land e.g. presently or capably used for agriculture, forestry or amenity purposes?	Land has layen unused for past 20 years when the sheep wash was last used. Quarry was filled in with debris 50 years ago and left to grow wild. It is not registered as derelict.	Site to be over laid with imported topsoil and contoured to reduce visual impact of development.
9	Is the site within the current settlement boundary?	Is the site within any identified settlement boundary in the Local Plan? Is it allocated for any uses?	Not as far as I am aware.	
10	Will the site affect the distinctiveness and special qualities of the present landscape character or affect any landscape designation?	Does the site conform with the Landscape Character Assessment (if available)? Will the site result in the removal of valued landscape features or negatively affect key views? Is it located within or would otherwise affect a National Scenic Area or Special Landscape Area, having regard to their special qualities?	No	
11	Will the site affect any areas with qualities of wildness (that is land in its original natural state)?	Are you aware if the site is inside or likely to affect an area of Wild Land? (These areas are identified on Map 3 of SNH's Policy Statement, Wildness in Scotland's Countryside) and areas of Remote Coast identified by the Council, or an area of wildness identified in the draft Wild Land Supplementary Guidance?	No	
12	Will the site affect a conservation area?	Is the site inside or likely to affect character of a confirmed Conservation Area?	No	
13	Will the site impact on any listed building and/or its setting?	Is there a listed building or a part of the setting "area" of a listed building within the site?	No	
14	Will the site affect a site identified in the Inventory of Gardens and Designed Landscapes?	Is any part of the site inside the outer boundary of an Inventory "entry" or will the site affect the setting of an "entry"?	No	
15	Will the site affect any locally important archaeological sites identified in the Historic Environment Record?	Does the site contain any features identified in the HER? If yes, will the site affect the feature?	No	
16	Will the site impact on an Scheduled (Ancient) Monument and/or its setting?	Is there any SAM within the site boundary or will a SAM be affected?	No	
17	a) Will the site affect any natural heritage designation or area identified for its importance to nature conservation? b) Will the allocation affect any other important habitat for the natural heritage?	a) Is any part of the site inside or likely to affect the designation (SAC, SPA, SSSI, NNR, Ramsar) or Local Nature Conservation Site? b) Is any part of the site within or likely to affect non-statutory features identified as being of nature conservation importance e.g. Ancient, Semi-Natural or Long-Established Woodland Inventory Sites, priority BAP habitats, habitats included on the Scottish Biodiversity List, non-designated habitats listed in Annex 1 of EC Habitats Directive?	No	

18	a) Will the site affect any priority habitat or species? b) Will the site affect any other important species for the natural heritage?	a) Will the site affect any European Protected Species, Badgers and species (birds, animals and plants) protected under the the Wildlife and Countryside Act 1981 as amended. If such a species may be present on or near the site, a survey should be carried out to inform this assessment (for which a licence from SNH may be required) b) Will the site affect species listed in the UK and Local BAPs, the Scottish Biodiversity List and relevant annexes of the EC Habitats Directive?	No	
19	Is the site proposed to provide any form of renewable energy?	For example, will the site provide or be capable of providing a district heating system, solar panels of a wind turbine?	Ground source heat pump.	
20	Is any part of the site at risk from fluvial or coastal flooding as shown on SEPA's flood map or from local knowledge?	<a href="http://www.sepa.org.uk/flooding/flood_risk_maps/view_the_map.aspx">Are you aware of any part of the site being within the 1 in 200 year flood risk contour as identified by SEPA? (which can be found here: http://www.sepa.org.uk/flooding/flood_risk_maps/view_the_map.aspx)</a>	No	
21	Will development of the site result in the need for changes in land form and level? If yes, how will soil and drainage issues be addressed?	Will there be any change in rate, quantity, quality of run-off plus groundwater impact on or off site? If so, will these affect priority habitats, especially blanket bog?	No	
22	Is there a watercourse, loch or sea within or adjacent to the site? If yes, how will the water environment be protected from development?	Will there be any culverting, diversion or channelling of existing watercourses?	No	
23	Will the site offer opportunities for sustainable waste management?	Will the waste produced by the site be minimised and processed close to source in a sustainable way?	No	
24	Can the site be connected to the public water and sewerage system?	Can the site be connected at reasonable cost? If not, what alternative is proposed?	No	
25	Will the site require alteration to the local landform?	Can the site (including access) be developed without significant re-contouring etc.? Will access tracks and parking areas have significant cut and fill?	No	
26	Will the site affect or be affected by coastal erosion or natural coastal processes?	This will be noted on any relevant shoreline management plan.	No	
27	Is the site sheltered from the prevailing wind and does it have a principal aspect between SW and SE?	Will development make best use of the site in terms of energy efficiency?	No	
28	Will the site have any impact upon local air quality?	Is the site near areas of employment or close to public transport? Such developments are less likely to result in additional traffic which may contribute to air pollution.	No	
29	Will the site have an impact on light pollution levels?	Is it likely that the Council policy likely will require street lighting at this location? Are there proposals for floodlighting on the site?	No	
30	a) Will the site affect the present green network of the area? b) Will the site provide opportunities to enhance the green network of the area?	a) Will the site affect features that currently provide for the movement of species and/or people e.g. woodland, hedgerows, field margins, watercourses, coastlines, tree belts, greenspace? b) Will connectivity of natural features or open spaces and paths be used for public amenity be improved? Will existing fragmentation of habitats and open spaces be improved? Will species be enabled to move where at present there is an obstacle?	No	
31	Will it provide opportunities for people to come into contact with and appreciate nature/natural environments?	Is the site close to (within 1.5km) an opportunity to come into contact with nature/natural environments e.g. Local Nature Reserves, local greenspace, green networks? Are there proposals which will increase opportunities to come into contact with nature/natural environments?	No	
32	a) Will the site affect any core paths or rights of way? b) Will the site affect any other existing paths or outdoor access opportunities? c) Will the allocation provide new access opportunities within the site and linking to the path network beyond the site?	a) Is a diversion of a core path or right of way required? Will there be any impact on the usability of a core path or right of way? b) Will it affect an existing path in the Highland Path Record? Will it provide additional access opportunities or adversely affect access opportunities afforded by the Land Reform (Scotland) Act 2003? c) Will new paths be created within and beyond the site? Will any existing paths be improved e.g. to increase accessibility to a wider range of users? Will the site help to realise priorities identified in the Council's outdoor access strategy or aspirational identified in the core path plans?	No	
33	Will the site have an impact on geodiversity of the area?	Are you aware if the site lies within or adjacent to an un-notified Geological Conservation Review site or Local Geodiversity Site? (or other site with geodiversity value e.g. distinctive landforms, areas with natural processes, rock exposures for study?)	No	
34	Will soil quality and capability of the site be adversely affected?	Will the site result in a loss of soil due to development or removal of good quality soil from the site? Is the site identified as Prime Quality Agricultural Land?	No	
35	Is the site on peatland?	Is the site within or functionally connected to an area of peatland? Would the allocation involve the disturbance of peat? If yes, how would impacts on peatland be avoided or minimised? Would any tree felling be required?	No	

36	Will the site have any affect on the viability of a crofting unit?	Does the site represent a significant loss of good quality inbye crofting land or common grazing land?	No
