

## Lochaber 21 - The Missing Piece

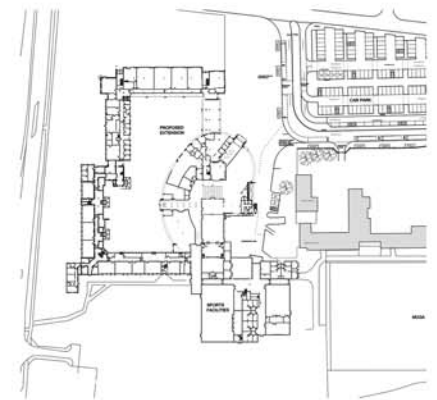

The latest phase in the master plan of the on-going redevelopment of Lochaber High School aims to provide the school with its own unique identity.

The project consists of a major extension and over cladding/re-roofing of the existing multi story teaching blocks.

The extension and re-modelling will provide the school with a processional route through the prominent entrance into much needed internal social spaces which gives the school a new focal heart.

Along with enhanced dining facilities the extension also provides a modern library space, staff and admin areas. This phase really is the missing piece for Lochaber High School.

With this phase of investment the end result will be a secondary school fit for the 21st century.
