3. Risk Register

- 3.1 The Fund's risk register was drafted by identifying the key objectives of the Pension Fund (key objective categories were Governance, Investments, Funding, Administration and Communications) and risks that would prevent these objectives being achieved. There were 82 potential risks were identified The next step was to score the risks as Red, Amber or Green depending on the impact and likelihood of the risk and taking into account any mitigating controls. The risk register was then circulated to the relevant officers for comment.

3.2 In order to manage risk on an ongoing basis, the risk register is reviewed regularly and risks are added as required. Any red and amber risks on the risk register and action being taken to manage and address these risks will be reported to the Pensions Committee meetings on a regular basis. Members also have the opportunity to highlight any risks that they consider should be added to the risk register.

4. Review of Current Pension Fund Risks

4.1 As at the 31 August 2016, there were no red risks and four risks were identified on the Highland Council Pension Fund risk register as being the most significant for the Pension Fund. The extract from the risk register is at Appendix 1.

4.2 The gross risk status for these risks is Amber, however taking into account mitigating controls, these risks are being actively managed and the residual risk status changes to Green.
