

**Item 9 - Question Time**

To the Leader of the Council

“What progress has the Administration made towards the compilation of a comprehensive land, property, and asset register for the Council since the meeting on 29 June 2016?”

Response to Mr Laird

Property asset mapping work is ongoing within the Councils ICT and D&I Service to support the publication of an online GIS map system that will provide the public with access to information on land and property that the Council owns. (This information is currently available for Council staff/Members on the Councils intranet). It is envisaged that this mapping system will be available to the public via the Council's Website by the end of February 2017.

Joint work on the development of an asset register for school equipment is ongoing and an initial system will be in place by the end of 2017.
