

The Highland Council
Isle of Skye and Raasay Committee
19 June 2017
Scottish Fire and Rescue Area Committee Performance
Report for 2016-17
Report by Local Senior Officer for Highland

Agenda Item	5
Report No	SR/9/17

Summary

To provide an update to Committee Members on the progress against the priorities outlined in the Area Plan for The Isle of Skye and Raasay 2016 - 2017.

Priority areas are identified through a range of Intervention, Prevention and Protection activities delivered in partnership to reduce risk to the communities of The Isle of Skye and Raasay.

The report also contains previously agreed information and performance as requested by Committee Members.

1. The Isle of Skye and Raasay Area Performance Report

- 1.1 The attached performance report shows the figures for 2016/17 as provided centrally from the Scottish Fire and Rescue Service (SFRS) performance management database and maintains the key indicators and timelines from previous reports.
- 1.2 In achieving the priorities within the Area Plan for The Isle of Skye and Raasay 2016 - 2017 a number of activities are being progressed including; the delivery of free home fire safety visits (HFSV) and post domestic incident response aimed at reducing dwelling house fires, supporting the partnership delivered road safety programmes and the reduction of fire-related antisocial behaviour through targeted youth engagement activities and thematic action plans. The continued application of the Unwanted Fire Alarm Signals (UFAS) Policy provides a means of targeting premises that the Service attends repeatedly and by engagement reduce the number of calls.
- 1.3 The performance report shows that Accidental Dwelling Fires, Fire Fatalities and Fire Casualties have fallen for the reporting period to date. Deliberate Fires have risen slightly but only one incident of this type has occurred. Special Service RTCs and False Alarm – Equipment Failures have shown a slight

increase from the previous year but remain low in number when compared to the Highland area total.

The Isle of Skye and Raasay personnel will continue to work in partnership with the clear aim of eliminating these types of incidents entirely.

- 1.4 The Service introduced a new retained duty system (RDS) recruitment process in 2015 and continue to target key stations and communities across Highland including The Isle of Skye and Raasay Area. SFRS personnel are promoting the campaigns with partner agencies, local media and are seeking more local area support in the communities identified. A new recruitment portal opened on the 21st of November 2016 which allows District staff to manage applicants locally as they apply and throughout the process.

Recommendation

Committee Members are invited to **comment** and **scrutinise** the attached Area Performance Report.

Group Manager Fraser Nixon

07 June 2017

Highland

Isle of Skye and Raasay Local Committee Performance Report

DISCLAIMER

The figures included in this report are provisional and subject to change as a result of quality assurance and review. The statistics quoted are internal management information published in the interests of transparency and openness.

The Scottish government publishes Official Statistics each year which allow for comparisons to be made over longer periods of time.

ID	Key Performance Indicator (KPI)	Pg
2bi	All accidental dwelling fires	3
3bi	All fatal accidental dwell. fire casualties	4
3bii	Non-fatal accidental dwell. fire casualties (excl. precautionary checkups)	5
1a	All deliberate fires	6
5a	Special Service - RTCs	7
10d	False Alarm - UFAS	8
	Station Availability	9

Commentary

The key performance indicators (KPIs) above have been extracted from the suite of KPIs contained within the Scottish Fire and Rescue Framework Document 2013.

<http://www.scotland.gov.uk/Resource/0041/00416181.pdf>

The KPIs above also represent the main priority areas for the Scottish Fire and Rescue Service, identified by elected members and communities during the ward consultation sessions in 2013 and throughout 2015.

- Reducing accidental dwelling house fires and the resultant fatalities and casualties
- Reducing deliberate fires
- Reducing road traffic collisions
- Reducing the number of attendances to unwanted fire alarm signals (false alarms)

All accidental dwelling fires

Month/Year	2012/13	2013/14	2014/15	2015/16	2016/17	Highland
April	0	0	1	2	0	7
May	0	0	1	0	0	18

Quarter 2	0	1	2	1	0	40
Quarter 3	2	4	0	4	4	41
Quarter 4	3	3	2	0	1	35

Commentary

The tables above represent the number of accidental dwelling house fires that occurred within the Local Committee boundary. Tolerances are set in context of the number of previous incidents by reporting month and, where there has been an increase in overall incidents, the colour coding is identified with the application of the red, amber and green (RAG) system.

Trend lines also identify the number of incidents over the reporting 5 year period, both by month and by reporting quarter. The figure for accidental dwelling fires for this reporting period is encouragingly at zero for the year to date and is the lowest figure for a number of years.

The Service works closely with partner agencies and communities to reduce the number of accidental dwelling house fires through the delivery of targeted Home Fire Safety Visits (HFSVs) and the installation of free smoke and heat detectors. Supporting the targeted delivery, partner agencies routinely share data identifying residents that would benefit from this free service, aiming to reduce the risk of fire and harm to householders and their property.

Post Domestic Incident Response (PDIR) is undertaken after every incident as a means of generating HFSVs, and raising fire safety awareness in the community.

All fatal accidental dwell. fire casualties

Quarter 2	0	0	0	0	0	0
Quarter 3	0	0	0	1	0	1
Quarter 4	0	0	0	0	0	1

Commentary

The attached tables identify the number of dwelling house fires that have resulted in fire related fatalities over the reporting 5 year period. The Service is committed to reducing this figure to eliminate all events and occurrences that result in a fatality. As identified, partnership working and data sharing supports this key aim and the delivery of targeted life safety advice and information.

The year to date shows no accidental dwelling fire fatalities for the reporting period.

Non-fatal fire casualties (excl. precautionary checkups)

Month/Year	2012/13	2013/14	2014/15	2015/16	2016/17	Highland

Quarter 2	0	1	0	0	0	4
Quarter 3	0	3	0	1	0	7
Quarter 4	0	4	0	0	0	8

Commentary

The attached tables identify the number of dwelling house fires that have resulted in fire related casualties over the reporting 5 year period. The Service is committed to reducing this figure overall, therefore reducing the impact on the community.

Again the figures show no accidental dwelling fire casualties to date however, the Service will continue to work with partners to continue to reduce the number of casualties.

All deliberate fires

Quarter 2	0	0	1	0	0	32
Quarter 3	0	1	0	0	0	47
Quarter 4	5	0	0	0	1	18

Commentary

Deliberate fires include those as a result of fire related antisocial behaviour (ASB) and wildfires. Analysis of the overall incidents and the periods in when they occur, identify seasonal variations e.g. muirburning season and holiday periods. The Service has introduced a number of fire reduction strategies and thematic action plans targeting these types of incidents. Working in partnership with other key agencies, the Service is working hard to reduce these incidents overall. Examples of which include the promotion of fire reduction through the Safer Highland ASB Group, promoting best practice and partnership working through the Scottish Wildfire Forum (SWF) and targeting key groups ahead of known peak activity periods.

The figures for deliberate fires show only one incident of this type to date for the area.

Quarter 2	0	1	1	3	5	74
Quarter 3	6	4	3	2	4	50
Quarter 4	0	1	4	4	2	40

Commentary

Special Service incidents involves an operational response to a range of emergency activities including life critical road traffic collisions, flooding events, industrial accidents and in support of other emergency service colleagues at larger multi-agency non-fire related events.

The most common type of special service is as a result of a road traffic collision involving, in most cases, a response from all three emergency services. The Service is working in partnership with other emergency response colleagues and partner agencies through the Highland Road Safety Group to reduce these incidents in the communities of Skye and Raasay.

The number of incidents of this type have shown a slight increase in activity but when compared across the total number for the Highland area they remain low in number.

Road safety activities in the area include e.g. Driving Ambition and Safe Highlander, all of which have a focused message of road safety, targeting key groups in the reduction of road related incidents as identified in Scotland's Road Safety Framework to 2020.

Quarter 2	5	10	7	2	19	279
Quarter 3	3	11	17	9	5	279
Quarter 4	12	12	9	9	12	238

Commentary

The Service responds to a number of false alarms over the reporting year, most of which are unwanted fire alarm signals (UFAS). The number of calls across the areas of Skye and Raasay have been consistent over the last 5 year reporting periods and remain low in number when compared to the wider Highland area.

A new policy was implemented on the 1st of December 2014 which requires SFRS personnel to work closely with duty holders in order to reduce the number of UFAS events. SFRS personnel will continue to do this to focus on driving these numbers down further.

Station Availability

Station	Availability %	Male	Female	Staff
Broadford	92%	6	1	7
Dunvegan	68%	7	0	7
Portree	100%	10	0	10
Raasay	79%	5	0	5
Staffin	94%	10	0	10
Uig	67%	6	0	6
Skye Area Committee Totals		44	1	45

Commentary

The table shows the current staffing levels on stations and total availability that these individuals have been available for calls, and how this affects the availability of the station's fire appliances.

The Service works closely with employers and RDS staff to support an improvement in availability. However, we recognise the challenges faced by RDS staff when combining primary employment and their operational availability across the communities in Highland area.

The Service is actively recruiting in a number of communities to improve station and fire appliance availability.
