

Item 9 - Question Time

To the Leader of the Council

How is the Mental Health Seminar convened on 21 March 2018 being followed up?"

Response to Mr R Laird

This recent Seminar on Mental Health for members was generally considered to have been constructive and informative and members felt that it gave an helpful overview of the major issues. It was acknowledged that there needs to be further discussion on the help required for people in distress and the supports that are available to them. We will be arranging a further Seminar that will involve service users and progress the discussions with the full range of mental health services and continue to pursue these matters.
