Thank you for providing me with Tain campus review and proposal documents, which I very much appreciate.

An incredible amount of work and detail for which all council staff involved should be thanked.

As one of the design team for the Craighill primary school in the 1970's which was designed for future expansion, it saddens me to think it will be demolished, however, it has served its purpose and that's life I suppose.

Regards,

Angus Jack

Your comments: Please consider making this a cycle friendly campus, with a layout similar but obviously smaller to that of the UHI Campus in Inverness. Make routes to the school cycle friendly, Improving sign postings and improving pathways so that everyone can cycle. As you will reduce traffic around the school. Please have sheltered Cycle sheds and maybe somewhere which could be a bike station so that they can pump up tjeir tyres if needed. This is a great opportunity to incorporate active travel,Health and Well being and climate change into the design and planning of the school and its surroundings. A great way to kick start the whole community into using bikes in the Tain area. There is then potential with there being a Train station also in Tain to have an active travel hub. There is support from many of the cycling organisations out there to help implement and support the surrounding communities that the Tain Schools will provide. Attitudes are more likely o change easier over the time if more children and staff are starting to travel to work/ school. If Cycle paths and safer routes to schools are not implicated in the planning from the beginning as you know it is harder to implement at a later stage and more costly.

Your comments: My bungalow is situated at the top of Provost Ferguson Drive with my garden backing onto the proposed site for the replacement Tain Academy.
My request is that all properties backing onto the site should have the necessary amenity corridor between the proposed site and their properties to enable maintenance of hedges and gardens etc.
These amenity corridors are successfully already in place at other Tain developments such as Viewfield Road therefore the precedent is already in place.

My property backs on to the proposed site of the new school. My request is that there needs to be an amenity strip between the site and all the properties backing on to it to allow for maintenance etc. There also needs to be adequate drainage for an already badly drained site to cope with the extra usage. Amenity strips are already in place, successfully, in other Tain developments.

Your comments: Consideration needs to be given to both parking and traffic management so that this does not affect the Tain Health Centre next door, which is used for the benefit of the local community.

Your comments: I am delighted that the Craighill site has been chosen for the proposed new Tain campus as I believe the Craighill site will provide the maximum potential benefit to the pupils and the town, allow for future expansion and addition of additional facilities, and minimise the impact of the development on surrounding residents and the town as a whole.

The TRA site was entirely unsuitable as reflected by the wide variety of serious issues and concerns that were raised against the site proposals.

I hope that full benefit is taken from the opportunity to provide a cost effective and attractive campus at Craighill utilising modular construction methods where possible.

I note that in the discussion of the costs of developing both sites no mention is made of the potential significant savings that could be made by developing the Craighill site with modular construction, and neither is any mention made of the significant additional costs that would have been associated with incorporating any measures to reduce the huge impacts of the extremely cramped TRA site. I raised this issue at the meeting at TRA last year, but it is not included in the summary of points raised.
