

Item 10 - Question Time

To the Chair of the Environment, Development & Infrastructure Committee

“With regards to the major capital projects that the Council will be doing in the future, can we get assurances that all projects will have complete financial control systems in place and any variations to the original signed contracts will be kept to an absolute minimum?”

Response to Mr Fraser

Financial control is a key part of project management in all projects in the capital programme. Major projects have individual boards which apply scrutiny to budget and contract changes.

A review of Capital Governance arrangements is about to commence and it is intended that this will be presented to Council in October.
