

**(17) Mr A Graham**

**To the Chair of the Economy & Infrastructure Committee**

**How many hydrogen refuelling stations for cars are there within the Highland Council area, and where are they located?**

*There are currently no Hydrogen refuelling stations for cars in the Highlands. However, it is important to note that hydrogen use in transport is still in a very early stage. The total number of refuelling stations in the UK is eleven with half of these being located within the M25. There are currently two in Scotland, both in Aberdeen.*

*The Council views green hydrogen as a significant opportunity for the region in the long-term decarbonisation of transport in an area where EV has some challenges and limitations, particularly in respect of heavy fleet.*
