

Agenda Item	4.
Report No	SCC/02/24

The Highland Council

Committee: Sutherland County Committee

Date: 23 January 2024

Report Title: Area Roads Capital Programme 2024/25

Report By: Executive Chief Officer Infrastructure, Environment & Economy

1 Purpose/Executive Summary

1.1 This report details the proposed 2024/25 Area Roads Capital Programme for Sutherland Area.

2 Recommendations

2.1 Members are asked to **approve** the proposed prioritised Area Roads Capital Programme for Sutherland Area.

3 Implications

3.1 **Resource** – All work will be managed within budget allocations with the Council delivering its legal responsibilities.

3.2 **Legal** – The combined programme for Structural Resurfacing and Structural Integrity Improvements enables the Council to meet its duty under the Roads (Scotland) Act 1984 within the Local Committee Area.

3.3 **Community (Equality, Poverty, Rural and Island)** – This report recognises that the local road network serves both strategic traffic and local access to remote communities. Road improvement schemes are selected on both the strategic and local importance and the extent and severity of defects. Noting that funding falls short of addressing all of the known defects, low volume and rural routes may be disadvantaged as prioritisation of limited funding dictates.

3.4 **Climate Change / Carbon Clever** – It is recognised that resurfacing operations do have a significant carbon impact. Consideration will be given to preventative maintenance techniques which includes recycling and surface dressing techniques, but the levels of defects often preclude such approaches.

3.5 **Risk** – The level of investment across Highland falls short of the budget requirements to maintain a steady state condition of the road network. Deterioration of the overall network will occur with a corresponding risk to the travelling public. An increase in damage claims can also be expected, as the road defects develop.

3.6 **Health and Safety (risks arising from changes to plant, equipment, process, or people)** – No implications arising from this report.

3.7 **Gaelic** – This report has no impact on Gaelic considerations.

4 **Background**

4.1 This report outlines the proposed area road capital programme for 2024/25 in accordance with the approved capital budget.

4.2 Works are delivered through roads workforce, augmented as required by external contractors. Due to the inter-relationship between the capital and revenue budget to fund the roads workforce, prioritisation to internal delivery will be given, with the use of external contractor being limited to projects where such additional funds permit.

4.3 It is recognised that the works necessary at any location may be a combination of works that are additional to the surfacing works.

4.4 Such surfacing works take time to plan and deliver and it is vital that the programme of works is agreed, as any delay in the agreed programme will impact on the construction programme, which is influenced by the availability of resources and also by the prevailing weather conditions as summer delivery is more reliable and durable.

4.5 We also need to ensure that such works are coordinated with utility companies so early uploading of the programme aligns with the necessary reporting requirements and allows the coordination of works.

4.6 Notwithstanding these works are as proposed in this report it is recognised that variation can be expected, and these will be agreed with members at ward business meetings to maintain a dynamic programme.

5 **Budget Allocation**

5.1 The local allocations capital budget for 2024/25 remains to be established which will be calculated from the approved capital budget allocation.

The capital budget for 2023/24 benefitted from an additional funding allocation, the previous baseline allocation of £7.2m was increased to £20m, however, this increase is not anticipated for the 2024/25 capital budget allocation.

The local allocations of the £7.2m capital budget for 2022/23 for the Sutherland Area consisted of:-

Budget	Overlay/Inlay	Surface Dressing	Total
Baseline capital budget	£529,579	£246,304	£775,901

6 **Road Structural Maintenance Programme**

6.1 Schemes were selected for inclusion in these programmes on the basis of need using the information gathered from the following sources and have been prioritised with the safety of the travelling public and sustainability of the road network as the main objectives:-

- Scottish Road Maintenance Condition Survey (SRMCS) data;
- Safety Inspections;
- Service Inspections; and
- Input and feedback from Members

- 6.2 The Scottish Road Maintenance Condition Survey (SRMCS) records data which is processed to show rutting, profile, cracking and surface texture. Surface texture is principally used in the preparation of surface dressing programmes. Rutting and profile data is used for surfacing programmes, while cracking data is used in both surface dressing and surfacing programmes.
- 6.3 All roads are inspected either monthly, quarterly or annually for safety hazards depending on their priority. Roads are also inspected in the course of preparing the works programmes. These inspections, together with specific concerns raised through Members and Community Councils, are considered for inclusion in the works programmes.
- 6.4 Prior to finalising the programmes, each site is again visited by experienced engineers to confirm the importance of the works against the network and the details of the designs. The current prioritised list is detailed within **Appendix 1**. Schemes listed above the red line can be funded from the anticipated baseline capital allocation. Those schemes below the red line will be undertaken subject to finalised capital budget allocation.

Designation: Executive Chief Officer Infrastructure, Environment & Economy
