

The Highland Council

Agenda Item	3
Report No	BSAC/04/24

Committee: Badenoch and Strathspey Area Committee

Date: 3rd June 2024

Report Title: Scottish Fire and Rescue Area Committee Performance Report

Report By: Local Senior Officer for Highland

1. Purpose/Executive Summary

- 1.1 This report provides an update to Badenoch and Strathspey Area Committee Members on progress against the priorities outlined in the Scottish Fire and Rescue Service Area Committee Plan.
- 1.2 Priority areas are identified through a range of Intervention, Prevention and Protection activities which are delivered through partnership to reduce the risk to the communities of Badenoch and Strathspey.
- 1.3 The report also contains previously agreed information and performance as requested by Area Committees.

2. Recommendations

- 2.1 Committee Members are invited to **comment** and **scrutinise** the attached Area Performance Report.

3. Badenoch and Strathspey Area Committee Performance Report

- 3.1 The attached performance report provides the current figures for Quarter 3 & 4 2023/24 and from the previous four reporting years from the central Scottish Fire and Rescue Service (SFRS) performance management database against the key indicators and timelines from previous reports.
- 3.2 In achieving the priorities within the Area Plan for Badenoch and Strathspey a number of prevention activities are being progressed including the delivery of free home fire safety visits (HFSV) through our operational On-Call Retained Duty System (RDS) and Volunteer Duty System (VDS) Crews and Community Safety Advocates (CSA), post domestic incident response (PDIR) both of which are aimed at reducing accidental dwelling house fires following our attendance at any incidents of this type.

Local managers also support the partnership delivered road safety programmes, and the reduction of fire-related antisocial behaviour through targeted youth engagement activities and thematic action plans.

Staff also undertake Operational Intelligence (OI) visits to the higher risk premises in Badenoch and Strathspey to gather vital information on the hazards

and risks on these sites which can help our operational response and firefighter safety.

- 3.3 It must be emphasised that the baseline figures for some of the indicators within the report are very low and this can make meaningful statistical analysis challenging. The low figures can also make it inappropriate to provide detailed data analysis which could compromise personal information.
- 3.4 SFRS continues to actively deliver its On Call RDS/VDS recruitment and training processes to meet the national and local requirements. While we promote campaigns through local media and key community contacts, continued local area support is welcome for recruitment across the district.
- 3.5 Since the implementation of the Unwanted Fire Alarm Signals (UFAS) Policy on the 1st July 2023, SFRS crews have attended 35 incidents in this reporting period. This is a decrease on this period when compared to previous years. This decrease has been achieved by implementation of the UFAS policy and also by providing support and working with relevant premises holders within the community. These incidents have all met the criteria of being premises classed as sleeping risks such as hospitals, care homes, hotels or domestic dwellings.

Designation: Local Senior Officer for Highland

Date: 24th May 2024

Author: Station Commander Nick Nethercott

PERFORMANCE REPORT

DISCLAIMER

The figures included in this report are provisional and subject to change as a result of quality assurance and review. The statistics quoted are internal management information published in the interests of transparency and openness.

The Scottish government publishes Official Statistics each year which allow for comparisons to be made over longer periods of time.

ABOUT THE STATISTICS IN THIS REPORT

The activity totals and other statistics quoted in this report are provisional in nature and subject to change as a result of ongoing quality assurance and review.

Because all statistics quoted are provisional there may be differences in the period totals quoted in our reports after original publication which result from revisions or additions to the data on our systems.

From 2015-16 onwards responsibility for the publication of end-year statistical data transferred from the Scottish Government to the Scottish Fire and Rescue Service (SFRS). This change of responsibility does not change the status of the figures quoted in this and other SFRS reports reported to the Committee.

INTRODUCTION

The 6-monthly monitoring report covers the SFRS's performance and activities in support of the seven priorities in the Local Fire and Rescue Plan for Highland:

- Priority 1 – Domestic Fire Safety
- Priority 2 – Unintentional Harm
- Priority 3 – Non-Fire Emergencies
- Priority 4 – Deliberate Fire Setting
- Priority 5 – Non-Domestic Fire Safety
- Priority 6 – Unwanted Fire Alarm Signals
- Priority 7 – Operational Resilience and Preparedness

As well as supporting the seven priorities in the Local Fire and Rescue Plan for Highland, this monitoring report shows how SFRS activities and performance contribute to the wider priorities of the Highland Council Community Planning Partnership (CPP), as set out in the Highland Community Plan.

The figures in this report are provisional, to provide the Committee with the SFRS's direction of travel in the Highland area, in terms of performance against headline indicators and targets. Most figures will not change; however, members should note that there may be some small variations for some indicators when the final confirmed figures are published by the SFRS.

The Highland Council Scrutiny and Audit Committee agreed to the Local Fire and Rescue Plan for Highland, covering the subsequent 3-year period. In support of delivering the priorities in this plan, 13 headline indicators and targets have been set, and form the basis of the report.

PERFORMANCE SUMMARY

The table below provides a summary of the three months (1 October 2023 to 31 March 2024) activity and year to date (YTD) progress, based on annual targets set against headline indicators. It aims to provide – at a glance – our direction of travel during the current reporting year.

Q3 & Q4: All Incidents Attended – 125		
Accident Dwelling Fires (ADF) 	ADF Fatal Casualties 	ADF Non Fatal Casualties 
Q3 & Q4 – 8 incidents YTD – 11 incidents	Q3 & Q4 – 0 YTD – 0	Q3 & Q4 – 0 YTD – 2
Home Fire Safety Visits 	Non-Fire Emergency 	Road Traffic Collisions (RTC) 
Q3 & Q4 – 67 Visits YTD – 139 Visits	Q3 & Q4 – 28 Incidents YTD – 55 Incidents	Q3 & Q4 – 12 Incidents YTD – 31 Incidents
Fatal RTC Casualties 	Non-Fatal RTC Casualties 	All Deliberate Fires 
Q3 & Q4 – 0 YTD – 0	Q3 & Q4 – 9 YTD – 28	Q3 & Q4 – 4 incidents YTD – 15 incidents
Deliberate Primary Fires 	Deliberate Secondary Fires 	Non Domestic Fires 
Q3 & Q4 – 0 incidents YTD – 3 incidents	Q3 & Q4 – 4 incidents YTD – 12 incidents	Q3 & Q4 – 3 incidents YTD – 9 incidents
Unwanted Fire Alarm Signals 		
Q3 & Q4 – 35 incidents YTD – 87 incidents		

PERFORMANCE HIGHLIGHTS

Of the 6 KPIs, the following performance should be noted for the six-month period 1 October 2023 to 31 March 2024.

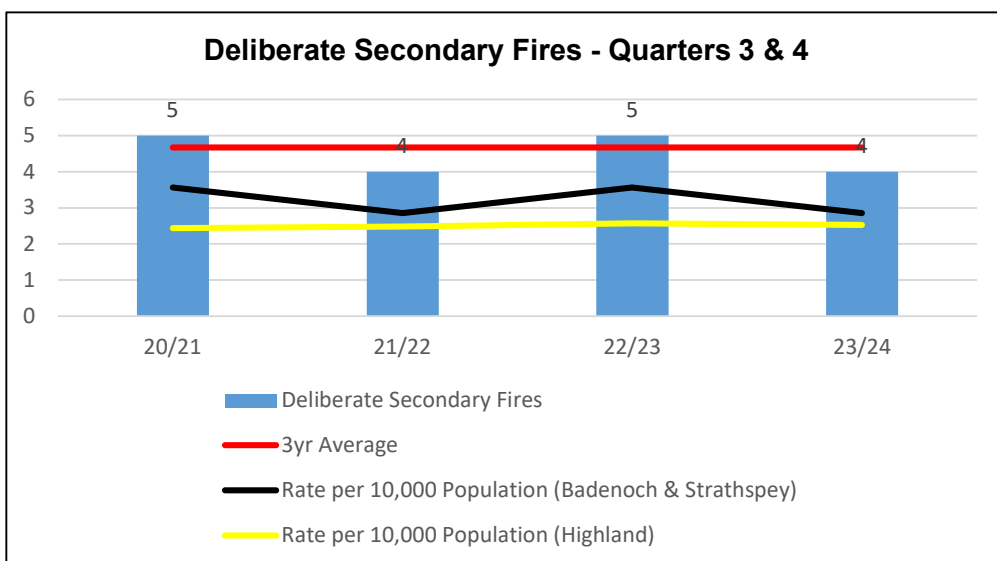

- There were **8 Accidental Dwelling Fires (ADF)** which is above the 3-year average. The majority were classed as low severity, requiring little or no intervention from the Service and minimal fire damage. There were **0 ADF Fatalities**, and **0 ADF Casualties**. All ADF's are offered Home Fire Safety Visits and agency referrals where required.
- There was **4 Deliberate Fires**, which were **0 Deliberate Other Primary Fire** and **4 Deliberate Secondary Fires** which is below the average. Referrals are made to other agencies for those at work within our communities.
- There were **3 Non-Domestic Building Fires** which is above the average.
- We attended **12 Road Traffic Collisions (RTCs)** which is in line with the -year average. There were **0 RTC Related Fatalities** however there were **9 RTC Related Injuries**, of which 6 went to hospital, four of them with what appeared to be serious injuries. Our Prevention teams are working with partner agencies through the Highland Road Safety group, Older driver Virtual Reality Scheme and Road Safety Scheme for new drivers.
- We attended **35 Unwanted Fire Alarm Signals (UFAS)** which is showing a decrease. From 1 July 2023, we have stopped attending AFA call outs to commercial business and workplace premises, such as factories, offices, shops and leisure facilities unless a fire has been confirmed. Our control room operators now ask anyone who reports a fire alarm to check whether there is an actual fire or signs of fire, before sending the nearest fire appliance. This does not apply to sleeping premises, such as hospitals, care homes, hotels or domestic dwellings who will receive the full pre-determined attendance (PDA). This change follows the SFRS public consultation in 2021.
- Our Community Safety Advocates and Station personnel undertook **67 Home Fire Safety Visits**. The majority targeted the most at risk in our communities.
